Project Details

The latest European projects in Istanbul, in the historical Topkapi, a vital and distinguished location adjacent to the most important main roads that bind Istanbul sides.

A touch of beauty and creativity in engineering design, as the project is signed by the largest construction companies in Turkey, which is famous for its distinctive real estate projects.

Spacious apartments with coordinated balconies enhance your living space and give you comfort through open views of the historical city.

An investment project surrounded by the most important public and private Turkish universities. Apartments are available in different styles suitable for university students.

A project is rich in many facilities and advantages that make it an investment and residential interface that attracts businessmen and real estate investors, and we can attribute this demand to the commercial market of the project.

It also includes an integrated street for the project with many places for cultural and recreational activities.

This vital project is suitable for investment and for Turkish citizenship
